CUSTOM COIN DESIGN FEATURES & PRICE GUIDE

This guide provides you with illustration and explanation of the various features that can be incorporated in your custom design. Familiarity with these terms and features will help you and your custom design specialist to refine your design requirements & respective pricing.

Die Styles

Two-Dimensional (2D)

Graphics are cut in single level, high/low relief. Suitable for type copy and line art graphics. Black & White, camera-ready artwork is required. Black indicates raised metal, and white indicates recessed metal.

Three-Dimensional (3D)

Graphics are cut in fully sculpted, multi-level relief. Recommended to accurately reproduce busts, landscapes and other complex designs. Requires the submission of high-resolution reference photographs or other suitable imagery.

Standard Finishes

Standard pricing includes your choice of classic Gold, Silver or Bronze (Copper) finishes.

Bright Finish

Highly polished bright finishes can be enhanced with additional sandblast treatment, for a sparkling contrast of raised graphics against frosted recessed backgrounds or with elegant 2-tone plating (gold or bronze + silver).

Antique Finish

Antique finishes illustrate the soft patina imparted by time and touch. Oxidized relief highlights the detail of your design. Antique finishes are recommended for designs which incorporate fully sculpted, three-dimensional imagery.

Finishing Touches

For a truly special presentation, enhance your custom design by incorporating any of these popular finishing treatments.

Color Fill

Your custom design can be enhanced by the application of enamel color. Enamel is applied in recessed areas where it can be “trapped” by surrounding raised metal. Standard pricing includes up to 4 colors per side. See price guide for information on additional color options

Diamond Cut Edges

Diamond cut edges can be applied to one or both sides of your custom design for added prestige and distinction. Choose from the following styles.

Flat Wave

Oblique

Petal

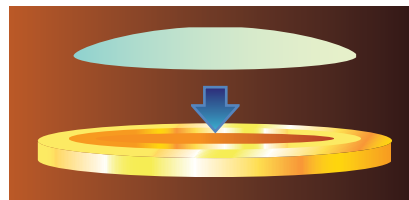

Federal

Clear Epoxy Dome

Optional Clear Epoxy Dome can be applied to enhance your design by providing additional depth of color. This option is best suited for two dimensional styles with color fill.
